Director General of Israel's Ministry of Health

The Israeli Digital Health industry has its roots in a long history of using innovative communication technologies to improve healthcare delivery, with more than 25 years of expertise in implementing health IT, electronic medical records and business analytics. Today, the Israeli government is investing strongly in IT, thus putting Israeli expertise in international demand. As of 2018, **there are more than 450 companies in Israel in the digital health innovation space**. All are developing solutions for digital health services that can be delivered through the web or mobile, and can improve the lives of millions of people around the world.
